Choose Lab Card Select

Lab Card Select allows your members to take their healthcare decisions into their own hands. By offering your members Lab Card Select, you give them the opportunity to save money by choosing to receive Quest Diagnostics high-quality laboratory testing at a reduced rate. When this voluntary benefit is utilized, the Lab Card Select program can save members 20% - 40% or more on outpatient laboratory testing services.

Designed Especially for Your Members

Lab Card Select program was designed specifically for high-deductible insurance plans and health savings accounts (HSAs). When the program is added to these plans, members have the opportunity to save money if they choose to have their laboratory testing sent under the Lab Card Select program to Quest Diagnostics. Money saved may be reflected in direct out-of-pocket expenses, future healthcare expenses or savings accounts. Neither payors nor members will pay any start-up or ongoing access fees for Lab Card Select.

Easy for Members and Payors

1. Lab Card Select members show their doctor's office their Lab Card Select card or insurance card with the Lab Card Select logo and request that their specimens be sent to a participating Quest Diagnostics laboratory for testing.
2. If the doctor collects specimens in the office, he/she sends those specimens to a participating Quest Diagnostics laboratory. If the doctor does not collect specimens, the member may go to an approved Patient Service Center.
3. Quest Diagnostics picks up the specimen, completes the testing and sends the results back to the physician, usually within 24 hours.
4. Quest Diagnostics determines eligibility of the member and edits, formats and transmits the claim to the payor. The payor verifies the claim and transmits the information to Quest Diagnostics. Quest Diagnostics then bills the amount or remainder of the claim to the member.

Both Member and Payor Save!
